

PREPARING BOAT COVERS FOR PICK UP

STEP BY STEP

1

Remove Boat Cover by cutting above the perimeter band going around the boat. Using a Dr. Shrink Film Knife makes this step quick and easy; their Film Knife has a safe-hooded blade to help protect your boat from scratches.

2

After taking the cover off the boat, remove buckles, vents, all strapping, and perimeter band. Dispose in trash normally.

MUST REMOVE:

3

Stuff ONLY your shrink wrap boat cover into EZ-Fill recycling bag, stuffing firmly to the bottom.

4

Zip tie bag shut at the base of where the plastic inside stops, so no water or dirt can get inside.

5

Store in a covered location where water and debris are minimized.

Contact Program Coordinator at jplant@michiganrecycles.org or 810-692-0195 for questions.
